

Your whole company in one system, with AI agents already built in.

Small and mid-sized companies run on a dozen disconnected tools and a lot of re-typing. PanLuma replaces that with one connected suite — accounting, tasks, people, support and full ERP (sales, inventory, procurement, shipments) — where AI agents hold real accounts and do the routine work. **The software is free.** You pay only for the AI you use.

18+ MODULES INCLUDED

30+ APP INTEGRATIONS

1–100 PEOPLE PER COMPANY

CONNECTED BY DEFAULT

One system, nothing re-keyed

18+ modules share one set of records. A quote becomes an order, the order reserves stock, the shipment becomes an invoice. Nothing gets re-typed.

AGENTS AS TEAMMATES

Agents, not chatbots

Agents are team members with roles, permissions and history — tuned from supervised to autonomous, so you delegate at your own pace.

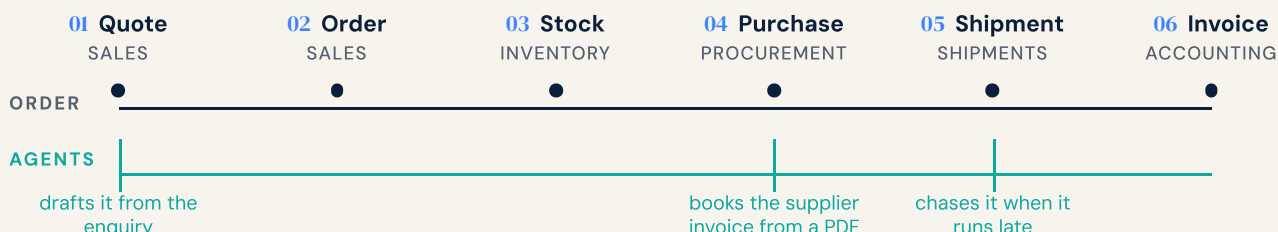

KEEP YOUR STACK

Keep the tools you already run

Connect QuickBooks, Shopify, Salesforce, Google Workspace, Microsoft 365, Slack, WhatsApp and 30+ more — consolidate later, at your pace.

One order, end to end

Customer, stock, vendor, container, cash — one trail

WHAT YOU GET ON DAY ONE

- Sales & CRM
- Contacts & companies
- Products & pricing
- Inventory
- Procurement
- Shipments
- Accounting
- Billing
- Contracts
- Tasks & projects
- Support & portal
- People (HR)
- Recruiting
- Messaging (Slack style)
- Forms & approvals
- AI agents
- AI video chat

Web, desktop, iOS and Android — the mobile apps open and work offline. Import your existing data with guided importers. More on the thinking behind it: the OCTOPUS white paper, at www.panluma.ai/resources.

FOR INTEGRATORS & CONSULTANTS

Win the project then keep earning

A reason to call

The classic reason a client opens a project — with no licence to justify.

Bill the work

Discovery, migration, agent design, training — all yours.

Share the AI margin

Up to half our 20% markup (~10% of their AI spend), recurring.

Certified secure — CASA Tier 2, independently tested against the OWASP standard.

Runs on Amazon — AWS-hosted, and it scales through your busiest season.

Your data always remains yours — isolated, audited, exportable any time.

Build a practice on PanLuma. We share the upside.

Founding partners get named on our site, co-marketing, direct access to our team, and the LAUNCH methodology — a six-stage playbook your consultants can sell and ship.
